The open meeting of the betternent league promises a thrill or two for all who are fortunate enough to get inside the Weber academy that night. The league's canvassers gathered some startling statistics in their rounds of the city last month. The public is to be let in on the inside of its own hopes. There I sto be music and speaking—just enough to keep the excitement down. "Raiding gambling houses will be

The stories told by animal trappers are always listened to with interest. John Patterson, who has charge of the menagerie department of Barnum & Balley's Greatest Show on Earth, tells a story of how the over watchful seal is caught alive; Barnum & Balley's expedition start-ed from Kotsebue Sound, Mr. Patterson's hunters were all Eskimos, for these little people are clever at hunting; they have grown so tryover a seal they immediately look owing. Then they walk toward the ceal, keeping to the leeward, that the wind may not carry any trace f them to the sharp scented animal. en they have arrived within mile of the seal they begin to crouch and moves on only when the seal's head is down for a few minutes of

The seal is one of the most wide wake of all creatures. It has the habit of throwing up its head every lew seconds to guard against danger. When its head is down upon the ice its eyes are shut. In these short periods it is supposed to take all he sleep it ever gets, in naps shorter han cat naps. The hunter watches it carefully and finally manages to come within about 200 yards of it. Then he lies down full length on the

Now begins the fun. The Eskimo understands the seal language. Ho looks like a seal because his clothes are made of sealskin. And he smells like a seal because he eats of the flesh and oil of the seal. So the seal thinks the Eskimo is one of his friends or cousins and begins to talk to him. This means that it flips up its tail. The Eskimo an-swers in the same way. He tosses up his foot, and at the same time moves a little forward. The seal has semething more to say in a little while and throws himself yet a little nearer.

When the seal's bead is down the hunter comes still nearer by dragging himself forward on his elbows. This sort of thing continues for some time. At last there is only a few yards between the two, sometimes but a few feet. Here the Eskimo watches for a good opportunity to catch the

S.S.S. REMOVES ALL HUMORS

The cause of all skin diseases can be traced to some humor in the blood. Healthy cuticles are only possible where the circulation is pure; and i srefere the cure of any skin trouble can only come from a thorough cleaning of this vital fluid. Salves, washes, lotions, etc., cannot cure. True, such treatment relieves some of the itching and discomfort, helps to reduce inflammation, and aids in keeping the affected parts clean, but it does not reach the blood, where the real cause is located, and at best can only be palliating and soothing. S. S. cures skin diseases of every character and kind, because it purifies the blood. It goes into the circulation and removes the humors that are causing the trouble, builds up weak, acrid blood, and completely cures fearem. Acne, Tetter, Salt Rheum, Poison Oak, and every other variety of skin affection. When S. S. S. has driven the humors from the blood, and purified the acid-heated circulation, every symptom passes away, the cuticle is again nourished with rich, healthful blood, and comfort is given to diseases-tortured skins.
